## What's Good for a -Year-Old

---

Three-year-olds are full of wonder and enjoy exploring many different aspects of their environment. A wide variety of books will enhance their exploration. Threes listen attentively to short stories and books. They enjoy repeating words, sounds, and rhymes. It's not unusual for them to want to hear the stories every night before going to bed. Wordless books will enable them to tell a simple story from clues in the illustrations. Threes can identify common colors and shapes and can count several objects. Books with these motifs will reinforce their grasp of these concepts. Sharing books with a 3-year-old can be the highlight of a day for both of you!
